

## Why are there parking restrictions in this neighbourhood?

The purpose of two-hour time restricted parking is to limit the number of non-residents who park in residential areas.

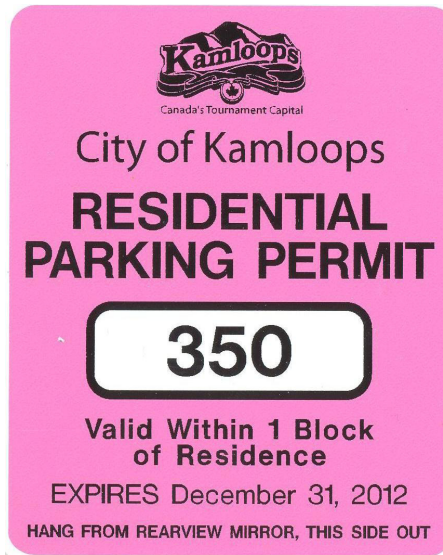

Residential parking permits provide the City of Kamloops with a record of residents who rely on being able to park on the street where they reside.

Permit holders cannot park their vehicles for more than 48 hours continuously without moving their vehicles.

While residential parking permits allow vehicles to remain parked on a street for up to 48 hours without moving, the vehicle, operators, and owners must comply with *Motor Vehicle Act* regulations and Traffic Control By-law No. 23-30.

## Parking Etiquette

Residents should remain mindful that parking on City streets is obtained upon availability of space. Out of courtesy for neighbours, residents are encouraged to park in front of their own residence when space is available.

# Two Types of Residential Parking Permits

## Residential - Licence Plate Specific for Address Only

- Permits must have a valid licence plate attached.
- Permits are non-transferable to other vehicles.
- Permits are valid within approximately one block of residence.

## Residential Visitor Permit and Residential Visitor Permit Card - Address Specific

- Visitor(s) must be visiting the property address.
- Hang the visitor permit on rear-view mirror and place residential visitor permit card on the dash.
- Permits allow visitor(s) to park up to a maximum of five consecutive days.
- In order to obtain a new booklet of visitor permits, return a completed booklet to By-law Enforcement at 6 Seymour Street West.
- Permits are valid within approximately one block of residence.

## FAQs

### What is the cost of a permit?

Residential parking permits are free.

### How do I obtain a permit?

The property owner is responsible for applying for parking permits.

Permits are valid for one year, from January 1 to December 31. Permit holders should apply at City Hall in mid-December to obtain a permit for the following year.

Property owners must supply the City of Kamloops with names, vehicle licence plate numbers, and proof of residency with their applications.

Proof of residency can be made with a utility bill, phone bill, rent receipt, or a driver's licence that associates the applicant's identity with the property address.

### What happens if I move or I acquire a different vehicle?

Residential parking permits are issued to specific vehicles and are associated with specific addresses. If a vehicle changes, your permit will not be valid and you must apply for a new permit in accordance with Traffic Control By-law No. 23-30.

### How many permits can I have?

Two permits may be issued for each single family residence and one additional permit may be issued for every 8 m of frontage for property that exceeds 16 m in frontage.

Street frontage refers to the property line adjacent to the street in the area normally considered the front of the home and/or lot, but does not include a secondary or side yard lot line.

### What happens if I do not have a permit?

By-law Officers regularly patrol two-hour time restricted areas. Vehicles that are parked for more than two hours without a permit may receive a fine or may be towed at the vehicle owner's expense.

### How long can I park my vehicle for?

Permit holders cannot park their vehicles for more than 48 hours continuously without moving the vehicle.

### Where should I display my parking permit?

Attach your permit to the rear-view mirror or place it face up on the dashboard of your vehicle. Officers must be able to clearly see your permit, and it must not be obstructed in any way. Failure to properly display your permit may result in a fine.
