Excluded pesticides = ALLOWED pesticides.

Residents may use ALLOWED pesticides containing only the ACTIVE INGREDIENTS listed on the opposite page.

Weed Control
Suppression des mauvai.

Read the Label

The **GUARANTEE** identifies the common name of the active ingredient.

The **ACTIVE INGREDIENT** is the part of the product which controls the pest.

The **CLASS** of the pesticide refers to where the product may be used.

Some of the lower-risk pesticides that are on the **allowed** list are: **acetic acid** (vinegar), **fatty acids** (insecticidal soap), **Btk** (naturally occurring bacteria) and **corn gluten meal**. (See opposite page)

If you choose to use allowed pesticides, be sure to use them properly. Follow all instructions on the product label.

Before using an allowed pesticide, there are a number of treatment options to consider.

Always practice IPM.

The source of this list is Schedule 2 and subsequent Schedule 5 of the Integrated Pest Management Regulation, BC.
