

Capital Projects Funding Breakdown

This section includes a detailed breakdown of the allocation of funding for the various capital items across the organization. In many cases, the funding must accumulated and allocated over several years to ensure that there are sufficient funds to start the specific project in the specific year. Each program includes the funding broken down by program and then summarized at the end by funding source.

Capital Projects Funding Breakdown

The City's Capital Program is made up of two key components:

Major Capital Projects - Funding for these types of projects is traditionally an investment in civic infrastructure that occurs periodically over the life of existing or new assets.

For example, in 2022, the Riverside Park Upgrades Project will result in a considerable investment to the downtown area park located adjacent to the Sandman Centre. This project's scope of this project includes erosion protection along the riverbank to protect sewer infrastructure in the event of a major flood event as well as upgrades to civic park facilities and park playground equipment, including the spray park facilities.

Minor Capital Programs - Funding for these types of programs is traditionally on a smaller scale, with an ongoing investment in civic infrastructure. This work occurs annually over the life of civic assets and is supported by routine equipment maintenance. A common term associated with this form of capital funding is asset management.

For example, in 2022, the Traffic Signal/Pole Rehabilitation Program delivers on two key objectives within this funding:

- a rehabilitation program focused on the downtown core to replace traffic signal poles that have corroded along with traffic signals that are becoming obsolete and require replacement
- focus on other areas of the city and upgrading equipment that accommodates increases in capacity at intersections.

The goal of this program is to improve street capacity without major road improvements and reduce the downtime for signals.

Capital Funding Sources

Property Taxes - A real estate tax that is calculated by a local government and paid by the property owner. The tax is usually based on the value of the owned property, including land.

Water Levies - The municipal rate charged to cover water services provided to residents by the municipality. Funds are allocated for operating, improving, maintaining, and expanding the infrastructure that supports the delivery of this service to city residents.

Sewer Levies - The municipal rate charged to cover sewer services provided to residents by the municipality. Funds are allocated for operating, improving, maintaining, and expanding the infrastructure that supports the delivery of this service to city residents.

Solid Waste and Recycling Levies - The municipal rate charged to cover collection of solid waste, recycling, and organics from residents and commercial customers by the municipality as well as fees collected from land fill users. Funds are allocated for operating, improving, maintaining, and expanding the infrastructure that supports the delivery of these services.

Community Works Funds - A component of the federal Gas Tax Program, these funds are received semi-annually through the Union of BC Municipalities as a predictable source of funding that is provided to municipalities on a per capita basis. The link below details projects and forms of investment that are eligible for community works funding.

https://www.ubcm.ca/assets/Funding~Programs/ Renewed~Gas~Tax~Agreement/Community~Works~Fund/ Examples-of-Eligible-Projects.pdf

Gaming Reserve - The Province shares gaming revenue with local governments that host casinos and community gaming centres in BC. Host local governments receive 10% of the net casino gaming revenue from casinos and community gaming centres within their jurisdiction. These funds are used by the City of Kamloops to support initiatives and enhancements that improve the quality of life in Kamloops.

Grants - Grants are non-repayable funds given by one party—often the federal or provincial government, a corporation, a foundation, or a trust—to a municipality. In order to receive a grant, some form of application or proposal is required. Grants received by the municipal government are made to fund a specific project and require some level of compliance and reporting.

Debt - Used by the City to fund capital initiatives. Civic debt mirrors a mortgage, whereas a debt purchase provides long-term value to the community and the residents. The City's approach is that the decision to take on debt to fund projects should be seen as a preferred alternative over significant short-term increases in taxation (or levies).

Development Cost Charges (DCCs) - Monies that a municipality collects from land developers to offset some of the infrastructure expenditures incurred in order to service the needs of new development. DCCs are imposed by bylaw pursuant to the Community Charter. DCCs are intended to facilitate development by providing a method to finance capital projects related to roads, drainage, sewers, water, and parkland.

Contractors and Others - Funds received by the City to offset the costs of performing work undertaken on behalf of a contractor.

Field User Fees - Funds received by field user groups that are allocated towards enhancing and improving the playfields that they use.

Private Contributions - Funds or donations of products or services that are received from either a corporation or an individual in support of an initiative undertaken by the City.

Land Sales - Funds generated by the sale of civic lands. These funds are placed in a reserve to provide funding for future land sales to support civic operations and services.

Reserves - Funds that have been received and set aside for a future intended use. Reserves that are currently in use include, but are not limited to:

- · solid waste
- other capital reserves
- parkland
- · equipment
- parking
- · future capital reserves
