

TOURNAMENT CAPITAL CENTRE

EFFICIENCY IN ACTION

LEED Bronze Certified
The building was recognized for its sustainable design at construction.

Daylight-Harvesting Windows
Frosted upper windows reduce lighting needs and help to control indoor air temperature.

Reflective Roof
A white roof reflects sunlight and deflects heat, keeping interiors cool.

LED Lighting Upgrades
Energy-saving LED lights replace traditional bulbs throughout.

Ground-Source Heat Pump
Exchanges heat energy from the earth and building for heating and cooling.

Heat Recovery System
Captures heat from the ventilation system to pre-heat pool water and indoor air.
