Proper Cart Placement

Park It

- wheels against the curb or just off the roadway
- front of cart facing the street
- arm's length distance between carts

Space It

When there is a parked vehicle, give at least an arm's length distance from the vehicle and curb.

Carts Not Collected?

Waste may not be collected if:

- material is not contained and the lid is not closed
- carts are inaccessible or spaced improperly
- carts contain unaccepted material

Help Us Serve You Better

Place carts at the curb by 7:00 am on collection day.

During Bear Smart season (Apr 1–Nov 30), set carts out after 4:00 am and properly manage bear attractants (Bylaw No. 40-67).

Cart lids must be completely closed for pickup.

Break boxes into newspaper-sized pieces so they can fall loosely from carts into collection trucks.

Carts must be kept clean.

Secure all carts on private property on non-collection days.

Place carts in a safe location for collection, away from overhead obstacles (trees, basketball hoops, balconies), fences, and parked vehicles.

Help improve collection efficiency. Set garbage and recycling carts out for collection when they are at least half full.

Place organics cart out every collection day, no matter the amount of material.

In the winter, place carts on the road side of snow piles and windrows.

Download the **Waste Wise Kamloops** app to sign up for collection day reminders.
